ENGLAND.

Report from Liverpool.

LIVERPOOL, ENGLAND, *March 8, 1902.*

SIR: I have the honor to state that for the week ended March 8, 1902, there were reported to the city health authorities 22 cases of smallpox; enteric fever, 13 cases; scarlet fever, 116; diphtheria, 20; and measles, 13. The smallpox originated in the city and does not seem to be in any way connected with the shipping. On March 4, 1902, I vaccinated, when necessary, the officers, crew, and cattlemen of the Johnston Line steamship *Indore*, bound for Baltimore, and on March 5, 1902, did the same to the officers, crew, and cattlemen of the Warren Line steamship *Sagamore*, bound for Boston.

Respectfully,

CARROLL FOX,
Assistant Surgeon, U. S. M. H. S.

The SURGEON-GENERAL,
U. S. Marine-Hospital Service.

Report from London.

LONDON, ENGLAND, *March 12, 1902.*

SIR: I have the honor to report that for the week ended March 8, 1902, 7 vessels left this port for ports in the United States, and there were vaccinated of the crews of these vessels 122 persons, 1 steamship having its own surgeon vaccinate its crew, and that number is not included in the above. The number of cases of smallpox reported continues about the same, and there were on the 10th instant 1,558 cases under treatment. The lay press reports that there are 208 cases of the disease in hospital in Glasgow. For the week ended March 1, there were 84 deaths from smallpox in England, 75 of which occurred in London, 7 in West Ham, 1 in Tottenham, and 1 in Swansea. For the same period there were 10 deaths from this disease in Glasgow.

For the week ended February 27, there were 7 cases and 3 deaths from plague in Mauritius. In Egypt, for the week ended February 23,
